

My Wife

After spending a lot of time recently reviewing internet porno sites, I came to the conclusion that I am very fortunate to have my wife. I learned that I had been taking for granted what many men would kill for. Let me cite some examples of what I mean: 1) MILF- of course I was already familiar with the concept of guys wanting to bang older women. My wife Tanya is 42 years old. Her body is not as tight as it was in her 20's, but she's still hot enough to give young guys boners. In fact, she gets hit on by younger men quite a lot. One of the reasons guys fantasize about MILFs is due to their sexual experience. I can tell you for sure that there is something to that. Tanya gets me off in a way that no other woman can. For those of you younger guys who are not convinced, let me put it this way: think of a hot young twenty-something who you consider really good at sex. Now imagine that she has twenty more years of practice on YOUR cock. Do you think she would learn a few tricks in that time? Yes, that's my burden... 2) Creampie- I had never heard the term until a few weeks ago. Tanya had a hysterectomy five years ago and consequently all our sex is unprotected, most often ending with me cumming in her pussy. I had forgotten that many men are not able to experience the pleasure of penetrating a hot woman without a condom getting in the way. Tanya begs me to cum in her pussy and often comments on my big load after it oozes out. 3) Small tits- Since my youth I have always preferred women with smaller tits. Tanya has perky A cup breasts that I have spent countless hours fondling and sucking over the years. There is still nothing as exciting to me as when I shoot my load while staring at her tits as she rides me cowgirl style. 4) Taller Women- Tanya is 5'10", 2 inches taller than me. She is five inches taller than me in heels. She takes great pride in her long legs, showing them off in public but especially in private where she rubs my engorged cock against her creamy thighs. 5) Hairy Pussy- Tanya alternates between neatly trimmed and a full bush, giving me the best of both worlds. 6) Premature Ejaculation- many men spend a lifetime working on the problem of cumming too quickly. With Tanya, I have the green light to cum at will. She not only says that I can cum any time, but she backs her words up in real life. One time recently I had not had sex in about a week and had not jacked off. By the time I entered her I was so horny I would have fucked damn near anything. Immediately (and I mean immediately) upon penetrating, I said "Oh shit. I'm going to cum already." Tanya started to buck wildly and said "Oh yes, please cum in me. I want you to cum now." I held back for about fifteen seconds for my own pleasure and then shot my wad. It was maybe the most glorious orgasm ever. On yet another occasion about six months ago, Tanya was giving me an incredible handjob as foreplay. I told her she'd better stop because I wasn't going to be able to hold off. She said that was okay and that I could cum now if I needed to. Needless to say, I shot hot jism all over her hand, stomach and tits. Tanya was so excited that she jacked me off with one hand, she was humping her other hand with her soaked pussy. Of course, I took over for her hand and finished her off manually after I came. Those are some examples that made me realize how lucky I really am. I realized there is probably some guy somewhere in the world who can only fantasize about cumming directly in the pussy of a hot experienced MILF. Not only do I get that regularly but I do not even have to worry about cumming too fast. That's the life!
